

Partner search/offer

Date (DD-MM-YY)

(*) – Mandatory

- **(*) Relevant topic(s) in work programme (code & name of the topic(s) line(s))**

HORIZON-CL4-2024-TWIN-TRANSITION-01-03

Manufacturing as a Service: Technologies for customised, flexible, and decentralised production on demand (Made in Europe Partnership) (RIA)

HORIZON-CL4-2024-TWIN-TRANSITION-01-05 Technologies/solutions to support circularity for manufacturing (Made in Europe Partnership) (RIA)

HORIZON-CL4-2024-TWIN-TRANSITION-01-41 Breakthroughs to improve process industry resource efficiency (Processes4Planet partnership) (RIA)

- **Quick description of the project concept**

Describe the

- objectives,
- activities,
- type of partners already involved and their skills
- partners requested and their skills

AFNOR is ready to join a Consortia as a Partner on HORIZON-CL4-2024-TWIN-TRANSITION-01 TWIN GREEN AND DIGITAL TRANSITION 2024

AFNOR (Association Française de Normalisation) is, according to the 2009 decree on standardisation (reference to be specified), the operator in France responsible for guiding and coordinating the drafting of national standardisation documents and France's participation in the drafting of European and international standardisation documents. In particular, the association ensures the programming of standardisation work on the basis of the identification of needs identified by the economic and social partners and the contributions of the standardisation offices.

Voluntary standards create favourable conditions for sharing and developing new products and services and act as innovation accelerators. Standardization is both a powerful tool for making optimal use of research and a vector for disseminating innovation. Used upstream of innovation as a tool for economic intelligence, voluntary standardization makes it possible to detect changes demanded by civil society players and therefore to guide technical choices in research and development and to develop new concepts. Standardization can therefore, in this sense, foster the emergence of innovation.

- **(*) Description of the expertise requested/proposed (up to 1000 characters)**

AFNOR is recognized as a major player in Industry standardization at national, European and international level.

AFNOR's expertise is well known in steering the development of a document by consensus. AFNOR is experienced since 1926 in publishing and drafting standards and standardization documents. Hence, AFNOR keeps its neutrality in relation to the various stakeholders and the subject under consideration.

- (*) Keywords describing the expertise requested/proposed (up to 10 words)

Standardization, Best practices, standards, Critical minerals,

Organisation information

(*) Organisation and country: AFNOR (France)
