

Partner Offer

Date of Submission: 03.02.2026

We are... ☒ offering ourselves as partners ☐ looking for a partner to join our consortium

Horizon Europe Call Topic

(Title or topic ID)

HORIZON-CL4-2026-05-DIGITAL-EMERGING-02 (Next-Generation AI Agents) and HORIZON-CL4-2026-05-DIGITAL-EMERGING-03 (Robotics Platforms) all other CL4 calls for which SSH and Stakeholder / Citizens Engagement is needed and useful.

Description of your expertise / the expertise you are looking for

(up to 1000 characters)

Missions Publiques offers 20+ years of expertise in human-centric governance, participatory design, and AI-society integration for EU research. We provide the governance, acceptability, and business innovation layer that allows next-generation AI and robotics platforms to scale in Europe through decentralized deployment, shared infrastructure, and human-centric governance models. Our expertise includes: Deliberative Governance with Citizens' Assemblies, value distribution mechanisms. We combine AI for deliberation with deliberation for AI governance and Robotics. We offer the WP on Engagement.

Keywords describing your expertise / the expertise you are looking for

(up to 10 key words)

AI governance, human-centric robotics, participatory design, citizens assemblies, multi-agent systems, trustworthy AI, SME business models, EU sovereignty, deliberation, value distribution

Description of your organisation or the consortium for which you need a partner:

Missions Publiques is a French SME specializing in participatory governance, deliberative democracy, and citizen engagement. With 20+ years of European Research experience, we coordinate and participate in major EU research projects. Our unique expertise combines AI for deliberation (using AI tools to enhance public participation) with deliberation for AI (involving citizens workers and stakeholders in AI governance decisions). We seek technical partners for robotics/AI platforms, multi-agent systems, and industrial applications to complement our governance and business model innovation capabilities for Syntropolis (AI agents) and DeToRo (robotics platforms).
