1. Short Profile of Organisation

Hive Ventures provides expert advisory services dedicated to driving the global adoption of innovative technology solutions that advance the Sustainable Development Goals (SDGs). Its core focus is on scaling cleantech, renewable energy, and environmental solutions to address climate adaptation and mitigation challenges in Europe and abroad.

Hive Ventures has been working at the intersection of technology, sustainability, and entrepreneurship, helping startups, businesses, and institutions accelerate innovation and expand their solutions to international markets. Expertise includes commercialisation and internationalisation strategies, startup acceleration, market research, innovation management, policy support and economic and technical feasibility analysis.

Hive Ventures has published work with the European Commission on innovation policy and R&I internationalisation including on **Artificial Intelligence, legal expertise, and ethical AI**. We have:

- Contributed the **drafting of the AI Act and the Digital Services Act**
- **Provide expertise on compliance, AI governance and frameworks.**
- **Developed frameworks for integrating regulations and ethical standards provided by legislation to support various different industries, civil society and SMEs**, such as data governance, algorithmic bias mitigation and data protection of fundamental rights.

2. Role in the consortium / Project idea

Development of Sector-Specific AI Governance Frameworks

- Create modular toolkits tailored to NGOs, Civil Society, Public Administration, SMEs and industry sectors for aligning operations with the EU AI Act, DSA, DMA, and EMFA.
- Include model policies, DPIA (Data Protection Impact Assessment) templates, and algorithmic risk classification tools.
- Build a repository of mappings from legislative requirements (EU AI Act, DSA, etc.) to technical implementation guidance (e.g., documentation, model cards, data sheets, logs).

Multi-Stakeholder Dialogue Workshops

- Run targeted workshops with regulators, tech developers, civil society, and end-users to test proposed compliance frameworks and codes of practice.
- Facilitate participatory design of AI use-case scenarios to understand sector-specific risk implications.

AI Compliance Pilot Testing

- Partner with SMEs, NGOs or public sector entities to implement and test the governance frameworks and codes in real-world use cases.
- Create a “sandbox” environment to simulate legal obligations under the EU AI Act and assess their operational viability.
