Our company "Virus" provides advanced expertise in cybersecurity, focusing on penetration testing, red teaming, and social engineering, with strong references in critical infrastructure and public sector projects. Our team combines over 20 years of experience with deep technical knowledge of application, network, and endpoint security. We are certified under ISO/IEC 27001 and ISO 9001, ensuring structured and reliable delivery. Beyond testing, we contribute to research and innovation in security assessment methods, cooperate with universities, and develop tailored training, CTF events, and awareness programs. Our expertise covers threat-led penetration testing (TLPT), secure development, and emerging technologies, making us a reliable partner for EU-level projects requiring advanced offensive security knowledge and practical experience in improving resilience.

In 2025, we were selected in the ENISA tender to support the agency in providing cybersecurity services in Slovenia.
