siehe Beispiele im Folgenden

Welche Texte muss ich lesen...

Gründlich lesen muss ich...

2. Den Einleitungstext zur jeweiligen Destination im Arbeitsprogramm

- Key Strategic Orientations
- Expected Impacts
- Relevant Policies

Destination 1: Climate neutral, Circular and Digitised Production

This destination will directly support the following Key Strategic Orientations (KSOs), as outlined in the Strategic Plan:³

- KSO C, 'Making Europe the first digitally led circular, climate-neutral and sustainable economy through the transformation of its mobility, energy, construction and production systems.'
- KSO A, 'Promoting an open strategic autonomy by leading the development of key digital, enabling and emerging technologies, sectors and value chains to accelerate and steer the digital and green transitions through human-centred technologies and innovations.'
- KSO D, 'Creating a more resilient, inclusive and democratic European society, prepared and responsive to threats and disasters, addressing inequalities and providing high-quality health care, and empowering all citizens to act in the green and digital transitions.'

Welche Texte muss ich lesen...

Gründlich lesen muss ich...

3. Die Beschreibung des jeweiligen Abschnitts (= Section) im Arbeitsprogramm

- **A new way to build**, accelerating disruptive change in construction

The construction industry needs to improve its productivity and competitiveness, and upskill its workforce. Its transition pathway depends on greater digitalisation, resilience and resource efficiency across the board. This need has been heightened by recent rising demand following the pandemic, pressure to maintain and repair works and to address hazardous substances.

2. In der Ausschreibung, der Destination oder dem Vortrag während der Info Days explizit erwähnte Hintergrund-Dokumente

Inspiration für Impact und Querschnittsthemen

The most relevant policies of the European Commission on this front are:

- The [European Industrial Strategy of March 2020](#), and in particular the [Update of May 2021](#): there is now a renewed momentum in the EU to tackle its strategic dependencies as well as to boost its resilience across key strategic areas. The Covid-19 crisis revealed the importance of improving production response and preparedness of EU industry, in support of its long-term competitiveness.
- The [Digital Decade](#) of March 2021, where the Commission presented a vision, targets and avenues for a successful digital transformation of Europe by 2030.
- The [Circular Economy Action Plan](#) of March 2020 announced initiatives along the entire life cycle of products. It targets how products are designed, promotes circular economy processes, encourages sustainable consumption, and aims to ensure that waste is prevented and the resources used are kept in the EU economy for as long as possible.
- The [Fit for 55 Package of July 2021, delivering the EU's 2030 Climate Target on the way to climate neutrality](#), given the process industries' 20% share of global greenhouse gas emissions.
- The [Zero Pollution Action Plan](#) of May 2021 addresses both pollution and waste, where research needs could be tackled and is particularly relevant to advanced materials and the process industries, as well as to the manufacturing industry.

Fit for 55 Package

HORIZON-CL4-2023-RESILIENCE-01-23

Section (2) in Destination 2: Safe and Sustainable by Design (SSbD) chemicals and materials

- **Definition:** Safe and Sustainable by Design (SSbD) ist ein Ansatz für das Design, die Entwicklung und die Verwendung von Chemikalien und Materialien, der auf die Funktion (oder den Service) fokussiert ist und gleichzeitig den schädigenden Einfluss auf die menschliche Gesundheit und die Umwelt reduziert.
- **Hintergrund:** Im Jahr 2022 hat die EU-Kommission einen entsprechenden Rahmen und Kriterien für Safe and Sustainable Chemikalien und Materialien veröffentlicht.
- **Vorgängerprojekte:** Im Rahmen von Horizont 2020 wurden bereits eine Reihe von Projekten gefördert, die auf die Definition und Implementierung des Safe-by-Design-Konzeptes für Nanomaterialien abzielten. → **knowledge base as foundation**

HORIZON-CL4-2023-RESILIENCE-01-23

Section (2) in Destination 2: Safe and Sustainable by Design (SSbD) chemicals and materials

- **Anwendungsgebiet:** Das neue SSbD-Konzept umfasst Chemikalien und Materialien, inklusive der *advanced materials* und der Nanomaterialien.
- **Ziel:** Der Fokus liegt auf der Portfolioerweiterung von Methoden und Modellen, die für das SSbD-Konzept sowie für die Anwendung des Konzeptes für die Entwicklung von SSbD-Alternativen für gefährliche Substanzen angewendet werden können.
- **Erwartungen:** Die Projekte der SSbD-Topics sollen zur Erweiterung der verfügbaren wissenschaftlichen Wissensbasis für die Regulatorik und für die Politikgestaltung beitragen.

HORIZON-CL4-2023-RESILIENCE-01-23

Section (2) in Destination 2: Safe and Sustainable by Design (SSbD) chemicals and materials

SSbD-Synergien:

- **Cluster 6** ‘Food, Bioeconomy, Natural Resources, Agriculture’ in areas Bio-based Innovation Systems in the EU Bioeconomy and Circular Systems
- **Cluster 5** ‘Climate, Energy and Mobility’ in view of areas on lightweight materials
- **Cluster 1** ‘Health’, Destination ‘Living and working in a health-promoting environment: research on impact of chemicals on human health’; and
- Horizon Europe **Partnership on the Assessment of Risks from Chemicals (PARC)**: on exposure and hazard activities as well as the SSbD toolbox and case studies.

Call – RESILIENCE 2023

Call opening: 01.12.2022 – deadline: **20.04.2023**

HORIZON-CL4-2023-RESILIENCE-01-23

Specific conditions

Expected EU contribution per project	The Commission estimates that an EU contribution of between EUR 6.00 and 7.00 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
Indicative budget	The total indicative budget for the topic is EUR 29.00 million .
Type of Action	Research and Innovation Actions
Technology Readiness Level	Activities are expected to achieve TRL 3-6 by the end of the project – see General Annex B.
Legal and financial set-up of the Grant Agreements	The rules are described in General Annex G. The following exceptions apply: Eligible costs will take the form of a lump sum as defined in the Decision of 7 July 2021 authorising the use of lump sum contributions under the Horizon Europe Programme – the Framework Programme for Research and Innovation (2021-2027) – and in actions under the Research and Training Programme of the European Atomic Energy Community (2021-2025). ¹⁵¹
Exceptional page limits to proposals/applications	In order to include a business case and exploitation strategy , the page limit in part B of the General Annexes is exceptionally extended by 3 pages .

HORIZON-CL4-2023-RESILIENCE-01-23

Expected Outcome: Projects are expected to contribute to the following outcomes:

- The ‘chemicals and materials’ community will be provided with computational models supported by **artificial intelligence** for the design of new chemicals and materials integrating functionality and the **Safe and Sustainable by Design framework**¹⁵²;
- The **innovation capacity of SMEs and industry** will be boosted with cost effective tools to find safe and sustainable alternatives to **substances of concern**¹⁵³;
- **Industry** will **lower the environmental footprint of materials and chemicals** through improved production methods and optimised applications from the design phase on;
- **Industry** will be more agile to respond to external and internal influences, e.g. new market demands for chemicals and advanced materials, regulatory requirements or the potential **shortage of currently used raw materials**;
- The **EU climate ambitions**¹⁵⁴ will be supported by contributing to a **decrease of greenhouse gas emissions** through a more **sustainable production and use of chemicals and materials**;

HORIZON-CL4-2023-RESILIENCE-01-23

Ursprung von SSbD

Scope: **The Commission initiative for Safe and Sustainable by Design¹⁵⁵** sets a framework for assessing safety and sustainability of chemicals and materials, which should be considered as a **reference in the proposal.**

Lösungsanforderungen

For an effective substitution of substances of concern¹⁵⁶ it is crucial that the **developed alternatives provide the functionality that is required of those that are replaced** (e.g., water or dirt repellent properties, insulation, etc.), **and have an improved safety and sustainability performance**. The **integration by computational modelling** of the chemicals and materials functionality with the Safe and Sustainable by Design framework will have a key role in the **green and digital transition of the European industry**. These tools will allow the exploration of which technical solutions are the most appropriate for respecting the **Safe and Sustainable by Design requirements in a cost- and policy-effective manner and thereby accelerate the innovation process for Safe and Sustainable by Design chemicals and materials.**

Kontext

Ziel / wider impact

HORIZON-CL4-2023-RESILIENCE-01-23

Proposals should therefore:

- Produce innovative modelling software for the development of chemicals and materials (including advanced materials) **building on high-throughput chemicals and materials characterisation facilities and relevant models** and make it available and interlinked through **open platforms accessible to SMEs and industry**;
- Develop predictive computational models and software to forecast the sustainability performance and support the assessment of sustainability aspects for newly designed chemicals or materials, in a tiered approach, already in the early stages and along the innovation process;
- Enable the integration of materials modelling, safety and sustainability assessment tools and databases into a single workflow. **Apply AI techniques** for data search and missing data, including statistical analysis (sensitivity and uncertainty), in all the areas covered: modelling of the functionality, safety and sustainability assessment (including life cycle assessment);
- ...

HORIZON-CL4-2023-RESILIENCE-01-23

Proposals should therefore:

- ...
- Address information exchange on chemicals and materials **along value chains** and throughout their life cycle and provide solutions for data accessibility in the different steps of the value chain for modelling/assessment purposes;
- Make developed models on chemicals, materials and their production process **FAIR**, and accompany them with a set of associated test data,
- Apply **FAIR¹⁵⁷ data principles**. The interoperability for data sharing should be addressed, **including synergies with other European projects addressing ontologies for data documentation**, for example projects resulting from topic **DT-NMBP-39-2020** [[OntoCommons](#)];
- Explore collaboration with existing **Open Innovation Test Beds (OITBs)¹⁵⁸**, where relevant;
- ...

HORIZON-CL4-2023-RESILIENCE-01-23

Proposals should therefore:

- ...
- The tools should be validated against existing data. **Application of the tools by external users should be tested within the project (industry and SMEs outside the project consortium, liaise eventually with projects resulting from the topic HORIZON-CL4-2024-RESILIENCE-01-24 in this Work Programme).**

HORIZON-CL4-2023-RESILIENCE-01-23

Proposals should **indicate to which chapters of the Strategic Research and Innovation Plan for chemicals and materials¹⁵⁹ they would contribute.**

Research should **build on existing standards**, where possible, and **contribute to standardisation**.

Proposals submitted under this topic should **include a business case and exploitation strategy**, as outlined in the [introduction to this Destination](#).

A **strategy for skills development** should be presented, **associating social partners** when relevant, for [developers of computational modelling and users of the models](#).

Projects should **build on or seek collaboration with existing projects and develop synergies** with other relevant European, national or regional initiatives, funding programmes and platforms, such as projects resulting from the topics [HORIZON-CL4-2021-RESILIENCE-01-08 \[IRISS\]](#), [HORIZON-CL6-2023-ZEROPOLLUTION](#) and/or [HORIZON-CL4-2023-RESILIENCE-01-39](#).

Proposals should **allocate the necessary resources for collaboration** with other relevant projects.

Synergies with Horizon Europe missions as relevant are encouraged.

Specific conditions

Expected EU contribution per project	The Commission estimates that an EU contribution of around EUR 10.00 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
Indicative budget	The total indicative budget for the topic is EUR 60.00 million .
Type of Action	Innovation Actions
Eligibility conditions	The conditions are described in General Annex B. The following exceptions apply: If projects use satellite-based earth observation, positioning, navigation and/or related timing data and services, beneficiaries must make use of Copernicus and/or Galileo/EGNOS (other data and services may additionally be used).
Technology Readiness Level	Activities are expected to start at TRL 3-5 and achieve TRL 6-7 by the end of the project – see General Annex B.

Call – DIGITAL EMERGING 2024

Call opening: 15.11.2023 – deadline: **19.03.2024**

HORIZON-CL4-2024-DIGITAL-EMERGING-01-04

Specific conditions

Procedure

The procedure is described in General Annex F. The following exceptions apply:
To ensure a balanced portfolio coverage, grants will be awarded to applications not only in order of ranking but at least also to the **two highest ranked proposals for each of the two expected outcomes** (1. The creation of systems to address large scale challenges using combined robotics data and AI solutions, 2. The creation of systems to address large scale resource optimisation challenges using combined AI and Data solutions). Proposals should **clearly identify** the outcome it will focus on.

Legal and financial set-up of the Grant Agreements

The rules are described in General Annex G. The following exceptions apply:
Beneficiaries may provide **financial support to third parties**.
The support to third parties can only be provided in the form of **grants**.
As third parties' grants may include robotics components, requiring high equipment investment and/or important effort to integrate in a use-case to address robotics challenges, the **maximum amount to be granted to each third party is EUR 200 000**.
40% budget for FSTP in sub-area 'creation of systems to address large scale resource optimisation challenges using combined AI and Data solutions'

HORIZON-CL4-2024-DIGITAL-EMERGING-01-04

Expected Outcome: Projects are expected to contribute to **one of the two following** outcomes, **exclusively**:

KI +
Daten +
Robotik

KI +
Daten

- The **creation of systems to address large scale challenges** using **combined** robotics, data and AI solutions that have significant impact on the objectives of the **green deal**. For example; in improving domestic energy consumption or in the cleaning up of contaminated land and waterways or in accelerating the circular economy along the complete value chain through automated waste avoidance and waste processing or reuse of materials.
- The **creation of systems to address large scale resource optimisation challenges** using **combined** AI and Data solutions, that have significant impact on the objectives of the **green deal**, such as optimisation of any kind of resources, from production to use along the complete value chain in order to minimise waste or foster the reuse of resources or in using AI and data solutions to maximize energy efficiency, ensuring energy security.

[...]

HORIZON-CL4-2024-DIGITAL-EMERGING-01-04

Expected Outcome: [...]

Which will contribute to

- The validation of solutions at scale by **demonstrating the potential of integrating these technologies** to address challenges in industrial ecosystems and develop solutions that are **environmental friendly** and contribute to the green deal
- Making and exploiting major advances in science and technology, to maintain **Europe's scientific excellence** and ensure sovereignty of these key technologies expected to affect the **society** in contributing to addressing major societal challenges affecting the environment.
- Exploring deployment solutions that can ensure **efficient scale up**.
- Boosting the uptake of AI, Data and Robotics to exploit the major contribution expected to environmental sustainability.

Proposals should **clearly identify the outcome it will focus on**.

HORIZON-CL4-2024-DIGITAL-EMERGING-01-04

Scope: Proposals should demonstrate the added value of integrating either AI and Data, or AI, Data and Robotics technologies through **large-scale validation scenarios** reaching critical mass and mobilising the user industry, while demonstrating high potential impact contributing to the **European Green Deal** objectives. **For example** in the recycling of electric car batteries, cleaning and monitoring the oceans, decommissioning energy infrastructure, supporting the recycling of materials, the optimisation of energy usage, the minimisation of resource waste in value-chains, for example through the better adaption of production to demand, etc.

Vision

[...] Focus should be given to **attracting new user industries**, and/or showing **new business opportunities** to boost the uptake of AI, Data and Robotics in major sectors and **stimulate the involvement where appropriate of end-users** to define the technological barriers to uptake and the use cases for deployment.

[...]

HORIZON-CL4-2024-DIGITAL-EMERGING-01-04

Scope: [...]

Proposals should address the **involvement of SMEs and/or start-ups** with significant potential to foster innovation through their engagement with large scale pilots. Focus will be on leveraging and nurturing emerging **collaborations between stakeholder communities** shaping an effective eco-system fit for the challenge of European AI, Data, Robotics, and on accelerating European R&I through structural involvement of innovative SME and deep-tech start-ups.

Proposals should target sectors and application domains with **wide-scale deployment potential** and maximum contribution to the green deal.

HORIZON-CL4-2024-DIGITAL-EMERGING-01-04

Scope: [...]

Multidisciplinary innovation activities should address **one of the following**:

- Large scale pilots bringing major industries from key application sectors in Europe – facilitating collaboration between small and large companies with the goal of **exploiting and integrating existing tools, sub-systems and solutions that are re-usable from other sectors** (thereby showing scalability/versatility, and enabling economies of scale) to have significant impact on the objectives of the green deal. The focus will be on the integration of tools, systems, sub-systems and solutions in the pilot by the grant beneficiaries. **In this case, proposals are not expected to involve the use of financial support to third parties.**
- The development of large-scale pilots addressing key applications with a significant and scalable impact on the objectives of the green deal by facilitating collaboration between small and large companies able address **key challenges in the deployment of AI, Data and Robotics**.

HORIZON-CL4-2024-DIGITAL-EMERGING-01-04

Financial Support to Third Parties: Projects should **use FSTP to leverage novel technical advantage** to address the operation of the pilot and to thereby support end users and service providers in addressing the challenges of the green deal. **Third parties are expected to use the pilots for developing, testing and validating innovative solutions** with significant impact on the green deal. Proposals should clearly delineate the expected contributions from the main beneficiaries as well as from the third parties, to ensure their coherence and impact. **40% of the EU funding** requested by the proposal should be allocated to the purpose of financial support to third parties.

Ethik,
Gleih-
stellung,
etc.

Proposals should either involve directly, or indirectly, appropriate expertise in **other relevant disciplines** for example related to environmental science and, as necessary, Social Sciences and Humanities (SSH) disciplines, especially where this is relevant to validating the effectiveness of proposed systems and technologies with respect to the green deal objectives.

Proposals should include a **clear business case and exploitation strategy**.

[...]

HORIZON-CL4-2024-DIGITAL-EMERGING-01-04

Scope: [...]

All proposals are expected to embed mechanisms to assess and demonstrate progress (with qualitative and quantitative KPIs, benchmarking and progress monitoring, as well as illustrative application use-cases demonstrating well defined added value to end users), and share communicable results with the European R&D community, through the **AI-on-demand platform** and/or the **Digital Industrial Platform for Robotics**, public community resources, to maximise re-use of results, either by developers, or for uptake, and optimise efficiency of funding; enhancing the European AI, Data and Robotics ecosystem through the sharing of results and best practice.

This topic implements the **co-programmed European Partnership on AI, data and robotics**.

D4: Digital and Emerging Technologies for Competitiveness and Fit for the Green Deal

Important dates

Call – DIGITAL EMERGING 2023

Call opening: 01.12.2022 – deadline: **29.03.2023**

budget:

2023: 237 mio.€

2024: 224.5 mio.€

Anschubfinanzierung A-HEU

Anschubfinanzierung Horizont Europa: A-HEU

- Förderung des **Auf- und Ausbaus europ. Netzwerke / der Konsortialbildung**
 - Insb. exzellente Einrichtungen ohne bisherige Erfahrung in der Koordination von EU-Verbundprojekten und entsprechenden europäischen Netzwerken
 - Ausbau der Netzwerke deutscher Forschungsakteure / Förderung der Konsortialbildung und Entwicklung von Projektvorschlägen (Antragsvorbereitung) für **Verbundprojekte** (keine CSAs)
- Im **2. Pfeiler von Horizont Europa**, d.h. zu den thematischen Clustern im Bereich „Globale Herausforderungen und industrielle Wettbewerbsfähigkeit Europas“

Anschubfinanzierung Horizont Europa: A-HEU

Zuwendungsempfänger: Hochschulen, außeruniversitäre Forschungseinrichtungen, andere öffentliche Einrichtungen, die Forschungsbeiträge liefern sowie KMU
– als geplanter Koordinator

Förderdauer: bis maximal zwölf Monate

Fördervolumen: bis zu 50.000 Euro

Zuwendungsfähig sind Ausgaben u.a. für Netzwerktreffen und Workshops, für Personal zur Koordinierung sowie Reise- und Aufenthaltskosten für antragstellende und Partnerinstitutionen

Die reine Antragstellung kann mit dieser Förderrichtlinie nicht gefördert werden/kann nicht alleiniges Ziel der Vorhaben sein!

Anschubfinanzierung Horizont Europa: A-HEU

Veröffentlichung Förderbekanntmachung:

April 2021

Stichtage für die Antragstellung:

**31. Januar, 31. Mai,
30. September**

Informationen: <https://www.eubuero.de/era-foerderrichtlinie.htm>
