

## Description of organisation

KPMG Malta is one of the largest professional services firms in Malta today. With a balanced mix of international and local clients, our goal is to turn knowledge into value for the benefit of our clients, our people, and the capital markets. KPMG combines our multi-disciplinary approach with deep, practical industry knowledge to help clients meet challenges and respond to opportunities. Services include Audit and Assurance, Tax, Advisory, and Digital Solutions.

KPMG Malta Advisory works with the world's leading organisations to create and protect the sustainable value of their business. Together, we help organisations create lasting value and responsible growth to make your business fit for tomorrow. The main Advisory services include Deal Advisory, Accounting Advisory Services, Risk Consulting, People and Change, Management Consultancy, Environment, Social and Governance (ESG), and Digital Solutions.

## Description of the digital solutions department

KPMG Malta have extensive experience in national digital projects targeting both public sector and private sector engagements, such as supporting the Government of Malta on various digital and technology strategies e.g., the AI Strategy, DLT initiatives, and Fintech Strategy. They have also participated in pan-European projects that target structural reforms in the area of digital and interoperable user-centric services. In terms of Digital Solutions, KPMG Malta offer their specialisation in several services, namely:

- **Advisory:** KPMG provides Digital and Cyber Advisory services. In addition to assessing your cyber security and aligning it to your business priorities, we help you develop advanced solutions, implement them, monitor ongoing risks and help you respond effectively to cyber incidents. KPMG also works with clients in the domain of digital transformation strategy, providing roadmaps to deliver winning business performance and delivers digital solutions to businesses and their customers.
- **Data and Analytics:** KPMG makes data easily accessible to the business, supporting decision making through in-depth analysis and analytics (e.g., AI), and organisation of data. Our main services are centred around Data Engineering (data management, data governance, data warehousing, data cataloguing), Business Intelligence (transformation of data into knowledge, new insights generation, visualisations including dashboards), and Advanced Analytics (use of AI and other advanced techniques).
- **Automation:** With years of experience within the Process Automation and Digitisation space, KPMG have become leaders in this area, assisting multiple businesses, both locally and internationally, within various industries to transform previously manual and mundane processes into digital and automated processes saving an extensive amount of time and costs. KPMG leverage Robotic Process Automation (RPA) and other low-code/no-code technologies to achieve their overall objectives.
- **Project Management:** We have gathered an exceptional team of project professionals, skilled in the art of practical project management, who are passionate about making a difference to our clients' business results. Our project management services focus on raising overall project management standards through consistency, knowledge, visibility, flexibility, and expert support. We focus on standard project management methodologies aligning with client's operational procedures and needs.
- **DevOps:** KPMG have become leaders in the area of the Software Development space by helping businesses and Governments, both locally and internationally, within various areas of development. With proven years of experience, at KPMG, we specialise in multiple disciplines

related to technology to help achieve the final objective of the business, be it different front-end and back-end frameworks, databases, cloud technologies, and IoT.
