

Use-case partner profile – Public Sector

Project Title: Construct-driven Framework and Tools for Assessing General Purpose AI - CRITIC

Call: HORIZON-CL4-2025-DIGITALEMERGING-04: *Assessment methodologies for General Purpose AI capabilities and risks*

Proposal Deadline: October 2025

Project Duration: 36 months

Budget Range: €4M

Coordinator: Munster Technological University, Cork, Ireland

Expected Role in the Project

We are seeking a governmental body, public agency, municipality, or NGO that:

- Uses or plans to use General-Purpose AI (GPAI) models to assist decision-making in areas such as:
 - Social services allocation/Welfare eligibility screening/Urban planning or resource optimisation/Public-facing communication or chatbot services
- Can provide a use-case where GPAI outputs influence or guide decisions with significant social, economic, or ethical consequences.
- Will collaborate on defining ethical benchmarks, evaluating AI trustworthiness, and aligning tools with legal frameworks (e.g., AI Act, GDPR).
- Will support stakeholder engagement, public perception research, and provide feedback on usability and risk management tools.

What You'll Gain

- Access to tools and insights to assess and validate AI **models** for public sector use.
- Opportunity to shape trust, explainability, and fairness benchmarks that reflect public values.
- Alignment with AI Act compliance and future EU evaluation frameworks.
- Visibility as a responsible and innovative adopter of AI in the public interest.
